Important Notice Regarding Fraudulent Emails

If you have received an email that appears to be from me but does not originate from my official email address hsue@patentable.com, suggesting you take action to preserve your trademark rights, please be advised that this is **not legitimate**. Please ignore and disregard any such messages.

For more information regarding this scam, please refer to the advisory issued by the College of Patent and Trademark Agents.

Hilton Sue advises clients on all aspects of intellectual property protection, and has particular experience and expertise in: preparing and prosecuting patent, trademark and industrial design applications in Canada, the U.S. and elsewhere; strategic analysis, planning, development and management of intellectual property portfolios; and the commercialization of intellectual property, including due diligence investigations and opinions and technology transfers and licensing.

Hilton represents a broad range of clients ranging from startups to international corporations. He is the Canadian patent counsel to a multinational designer/producer of audio, electronic and infotainment systems. He also prosecutes large numbers of Canadian patent applications for a major Asian mobile phone company and is the Canadian trademark counsel for a major U.S. interactive gaming and entertainment company. Hilton also advises and assists many local clients in developing patent and trademark portfolios in multiple countries. He also has much experience in advising and assisting clients in buying, selling or licensing their intellectual property.

Hilton studied Electrical Engineering (Computer Engineering Option) at the University of British Columbia before also completing his law degree at UBC. He has received numerous awards for academic achievement, including the UBC Chancellor Scholarship, the Law Foundation of B.C. Entrance Scholarship, and others. Hilton's patent practice is primarily in the electrical/electronic, computer, communications and mechanical fields, and his training as an electrical/computer engineer prior to studying law enables him to readily understand inventions in these fields and assist/advise clients regarding how best to protect those inventions through intellectual property law.

Hilton is a Certified Licensing Professional, one of the first professionals in Canada and the USA to achieve this designation. Outside of work, Hilton is an avid traveler, foodie and amateur photographer.
